

**Company name: Toronto Hydro, Program Management Department**

My eight-month internship experience at Toronto Hydro under the Program Management Department in 2014-15 was phenomenal. This experience has given me the opportunity to develop valuable work skills, technical skills and overall help build my resume. In terms of workload I liked how interns were given a fair amount of responsibility. This makes you feel more involved with the company overall. What I love the most about this experience was the ability to talk to managers, supervisors and co-workers about their personal success story and how they established themselves. This was influential in terms of what my future plans are after graduation. Overall, my internship experience was hugely inspiring experience, while being challenging as well throughout my term, which has allowed me to develop my skills.
